PROFESSIONAL SUMMARY

2026 Engineering graduate in Data Science and AI from UIK. Experience across machine-learning evaluation, Salesforce automation, ECG telemonitoring integration, and backend development. Interested in Data Scientist and AI Engineer roles.

TECHNICAL SKILLS

Programming: Python, SQL, Bash | ML: scikit-learn, XGBoost, LightGBM, SHAP
Deep Learning: PyTorch, TensorFlow/Keras, CNNs | GenAI: RAG, LLM evaluation, Groq/Llama
Backend and data: FastAPI, Flask, Node.js, Express, REST APIs, MongoDB
Salesforce: Apex, Lightning Web Components, Flow, Agentforce | Tools: n8n, Git, pytest, GitHub Actions

EXPERIENCE

PFE Consultant / Data Science Engineer | Talan Tunisia Feb-Jun 2026

- Designed Smart Sales Advisor across Salesforce CRM, n8n lead automation, ML scoring/conversion, FastAPI and Agentforce-assisted sales workflows.
- Kept model claims tied to synthetic or benchmark datasets and required manager approval for generated quotes.

Backend and AI Developer | Caredify Summer 2025

- Integrated ECG inference into a telemedicine platform using a Node.js/Express gateway, Flask AI service, authentication and real-time alert escalation.
- Model results were evaluated on MIT-BIH and European ST-T benchmark data; not presented as clinical production performance.

Web Developer Intern | CyberOcean Aug-Sep 2024

- Solo-built a responsive MEVN marketplace workflow for client/provider profiles and service listings during an engineering-cycle internship.

Web and AI Developer Intern | CyberOcean 2023-2024

- Contributed to inventory and SaaS workflows in a Scrum team using Vue/Nuxt, Node.js, Socket.IO and RethinkDB.

Web Developer Intern | Tunisie Telecom 2022

- Built an academic PHP/MySQL services prototype with customer browsing, administrator workflows and UML design.

EDUCATION

Engineering Degree - Data Science and AI | UIK 2023-2026 | Graduated

Licence in Computer Science | ISI Kef 2020-2023 | Graduated

SELECTED PROJECTS

Case studies, supporting resources and limitations are available on ayoubhannachi.com.

Smart Sales Advisor - Salesforce and Agentforce | Talan Tunisia, 2026

Designed an end-to-end B2B sales workflow linking lead acquisition, enrichment, ML scoring, requirements analysis and quote preparation.

Evidence: Sentiment ROC-AUC 0.952 on 76,703 reviews; conversion ROC-AUC 0.9445 on synthetic leads. Human approval remains required.

Caredify - AI-Assisted ECG Telemonitoring | 2025

Integrated a two-stage ECG inference workflow with web/mobile clients, backend services and timed alert escalation.

Evidence: Approx. 98% CNN results on MIT-BIH and approx. 93% XGBoost results on European ST-T; benchmark datasets, not clinical deployment.

Earthquake and Tsunami Risk - Reproducible ML Pipeline | UIK, 2025-2026

Built a Python classification workflow with data checks, pytest, Makefile and GitHub Actions CI.

Evidence: ROC-AUC 0.748; 0.90 accuracy matches the majority-class baseline. Documented severe class imbalance and detector limitations.

Fashion-MNIST - Classical Model Benchmark | UIK, 2023-2024

Compared seven classical ML models on the official Fashion-MNIST split with cross-validation and class-level error analysis.

Evidence: XGBoost 88.35% accuracy across 10 classes and 70,000 images; shirt-removal results are not comparable to the full benchmark.

Tuninventory - Multi-Instance Inventory SaaS | CyberOcean, 2023

Contributed to inventory, product and administrator workflows in a four-developer Scrum team across three sprints.

Evidence: Demo: intern-dev-hannachi.monocommerce.tn; source is private to the internship.

SELECTED CREDENTIALS

IBM Deep Learning with PyTorch, Keras and TensorFlow | IBM / Coursera, 2025
Explainable AI (XAI) | Duke University / Coursera, 2025
Fundamentals of Deep Learning | NVIDIA, 2025
Evaluation and Light Customization of Large Language Models | NVIDIA, 2025
Learning Linux for LFCA Certification | LearnQuest / Coursera, 2023

LANGUAGES

Arabic | French | English
